DDMK18

THE DDM4'S BEAUTY IS MORE THAN SKIN DEEP.

Many so-called "Black Rifles" may look similar on your gun store's wall, but look deeper and you begin to see why Daniel Defense's carbines stand out from the crowd. We don't cut corners on any aspect of the design, manufacturing, or assembly of each and every DDM4 model.

From selecting the raw materials, to our testing and QC processes, we control every aspect of the DDM4's creation. Details like cold hammer forged barrels, properly-staked carrier key screws, beveled magwells, and individually-tested (MPI & HPT) bolts make a huge difference in the lifetime performance of a rifle.

No detail is too small in our pursuit of perfection. We only put the Daniel Defense name on products you can count on, no matter what. Visit DanielDefense.com today!

When I started Daniel Defense I never imagined we would have grown the company into what it is today. Over the last decade we have seen tremendous growth as a company, and that is because of you, the customers we serve. While

there have been down times in the market and political attacks on our right to keep and bear arms, you have always remained loyal to the brand that we have built together. I speak for every employee at Daniel Defense in saying "thank you". We

stand eternally committed to offering you the very best small parts, accessories, rails, rifles and customer service in the firearms industry. Regardless of whom we are making rifles for, we only make them one way:

to the highest standards in the firearms industry.

MARTY DANIEL
PRESIDENT AND CEO OF DANIEL DEFENSE

As the finale of 2012's Torture Test 2, 35lbs of explosives were placed under a vehicle to simulate an IED exploding during a convoy. The rifle survived, less the plastic butt stock as shown to the left, and with the slightest tweaking of the buffer tube, was able to be fired without issue.

DDM4[®] TORTURE TEST

Why take a perfectly good rifle and come up with as many ways as possible to destroy it? Three reasons- 1. Because we at Daniel Defense constantly strive to test and improve our products; 2. Because you can't truly evaluate a product's performance until you find ways to push it to failure; and 3. Because it's a hell of a lot of fun! Follow the links below to see DD rifles buried, dropped, frozen, drowned, dragged, even dropped from helicopters, and placed in the middle of explosions!

See the original DD Torture Test at

COMPLETE DD RIFLES DDM4V1

5.56

The original Daniel Defense Rifle, The Daniel Defense M4 Carbine created the definition of tactical perfection. Every aspect of this rifle was engineered with the professional and shooting enthusiast in mind. Built to redefine the benchmark in small arms performance, this precision crafted firearm will perform faithfully in any Military, Law Enforcement, Homeland Security, or Personal Defense Environment. Available in your choice of either an M4 or Lightweight profile barrel.

One of the V1's most visible attributes is its proprietary front sight base, CNC-machined from 4140 steel, finished with a salt bath nitride surface treatment, and featuring a serrated curved design to minimize glare.

Like all DDM4 models, the V1 features Daniel Defense's beveled and flared magazine well for faster, more secure reloads.

The DDM4 Rail™ 12.0 FSP on the DDM4v1 provides extra rail space beyond the carbine front sight base for the mounting of lights or other accessories as well as giving the user more room for an extended shooting grip.

Also available with a lightweight profile barrel.

COMPLETE DD RIFLES DDM4V3

5.56

The DDM4v3 combines the benefits of the original DDM4v1 with the advantages of a mid-length gas system. Built around a 16" Cold Hammer Forged barrel and our proprietary front sight base with serrated, curved design, the V3 provides shooters with a 9" free-floating DDM4 Rail™ quad rail, and a vertical foregrip for better weapon manipulation.

Like the V1, the V3 provides a solid, reliable, and advanced proprietary front sight block, CNC-machined from 4140 steel, finished with a salt bath nitride surface treatment, and featuring a serrated curved design to minimize glare.

The V3's lightweight DDM4 Rail™ is free-floating and offers 4 rotation-limited QD sockets.

The V3's mid-length DDM4 Rail™ provides an uninterrupted top rail and ambidextrous rotation-limited QD sockets. The mid-length gas system makes it a soft and controllable shooter.

COMPLETE DD RIFLES DDM4V5

5.56

The DDM4v5 complete rifle is one of the most popular models, lightweight, and can serve any role from competition to home defense. It features the DDM4 Rail™ 12.0 and 16" mid-length Cold Hammer Forged barrel with pinned low profile gas block. The design combines the accuracy of a rifle-length sight radius with the smooth-shooting mid-length gas system. The 12" quad rail provides plenty of real estate for customization to include the mounting of lights, lasers, sights, and grips.

The rifle length DDM4 Rail™ is lightweight and mounts to the upper receiver via the latest 4-bolt version of Daniel Defense's patented Bolt-Up System.

The V5's free-floating DDM4 Rail™ has a narrow profile that increases comfort while keeping weight to a minimum.

Daniel Defense Rail Panels with signature DD pattern provide a more comfortable soft-touch grip and shield your hand from excess heat. The Daniel Defense fixed sights are available separately; see the "accessories" section.

Available in our exclusive MilSpec+™ or Daniel Defense Tornado™ Cerakote.

Also available with a lightweight profile barrel.

COMPLETE DD RIFLES DDM4V7

5.56

The DDM4v7 features the Daniel Defense Modular Float Rail 12.0, which provides each shooter with the ultimate in modular adaptability. This carbine comes with a 16" mid-length Cold Hammer Forged barrel and pinned low profile gas block. The MFR's slick profile features three 3" modular Picatinny sections that can be placed anywhere along the rail system.

The MFR™ 12.0 rail can be run "slick" to give absolute minimal weight, or by using the included picatinny rail sections, the user can customize exactly where accessories are mounted.

Like all DDM4 Rifles, the V7 is built around Mil-Spec forged 7075-T6 aluminum receivers, with rich black hard anodizing, and laser-engraved markings.

The smooth, lightweight MFR™ 12.0 allows the shooter to fully customize the placement of accessory rails. The Daniel Defense fixed sights are available separately; see the "accessories" section.

Also available with a lightweight profile barrel or with our exclusive MilSpec+™ Cerakote.

COMPLETE DD RIFLES DDM4V9

5.56

The DDM4v9 rifle satisfies the needs of shooters demanding an extended quad rail for use in popular shooting sports as well as tactical and defensive applications. The DDM4 Rail™ 15.0 gives operators the option to have the support hand extended close to the muzzle, allowing them to drive the gun more precisely and prevents over travel when transitioning between multiple targets. The 16" Cold Hammer Forged barrel with mid-length gas system results in a smoother recoil impulse for quick, but precise rapid fire and reduced wear on parts.

The DDM4 Rail™ 15.0 provides the V9 with a long sight radius for precision shooting with iron sights. The long expanse of Picatinny rail allows the user to customize exactly where accessories are mounted.

Like all DDM4 Rifles, the V9 is built around Mil-Spec forged 7075-T6 aluminum receivers, with rich black hard anodizing, and laser-engraved markings.

The 15" DDM4 Rail enables the shooter to have an extended sight radius when mounting fixed sights. The Daniel Defense fixed sights are available separately; see the "accessories" section.

COMPLETE DD RIFLES DDM4V11

5.56

The DDM4v11 was designed for shooters who prefer the benefits of the KeyMod attachment system integrated in the new SLiM Rail™ (Slim Lightweight Modular).

The 15" rail, with Keymod attachments at 3, 6 and 9 o'clock, offers incredible ergonomics, weight savings, superior cooling and modularity, while giving operators the option to have the support hand extended out closer to the muzzle. An uninterrupted Picatinny rail on top allows for maximum sight radius with rail-mounted iron sights. The 16" Cold Hammer Forged barrel with mid-length gas system results in a smoother recoil impulse for quick, but precise rapid fire and reduced wear on parts.

The DD SLiM Rail™ is incredibly lightweight and long enough to allow a comfortable grip no matter the operator's shooting position. The Keymod interface provides a low-profile interface for mounting accessories.

Like all DDM4 Rifles, the V11 features our new stock and grip. Combining ergonomic shapes with soft-touch rubber overmolding, the new DD furniture provides a secure grip and comfort in all weather conditions.

The smooth, lightweight SLiM Rail™ 15.0 features Keymod interfaces at 3, 6, & 9 o'clock allowing the shooter to fully customize the placement of accessories. The Daniel Defense fixed sights are available separately; see the "accessories" section.

Also available in our exclusive MilSpec+™ or Daniel Defense Tornado™ Cerakote.

COMPLETE DD RIFLES DDM4V11 PRO

5.56

The DDM4v11 Pro Series was designed for competitors looking to dominate podiums in today's popular multi-gun matches. Built around our newest 18" Strength-to-Weight, Cold Hammer Forged barrel, this platform delivers the speed, controllability, and precision required to engage the course designer's most difficult stages. The new Muzzle Climb Mitigator redirects propellant gasses through calibrated ports, countering both recoil and muzzle climb. Combined with the softened recoil impulse of a rifle length gas system, results equal shorter split times, more precise follow-up shots, and reduced fatigue. A Geissele Automatics Super Dynamic 3 Gun Trigger delivers rapid hits on target with its light, short pull and quick reset. Competitors will also appreciate the larger latch provided by a Vltor BCM Gunfighter Mod 4 Charging Handle for easier manipulation under magnified optics.

Recoil and muzzle rise are drastically reduced by the new DD Muzzle Climb Mitigator Gen II.

Ready for competition right out of the box. The DDM4V11 PRO comes with the super high performance Super Dynamic 3-Gun trigger from Geissele Automatics.

The V11 Pro features a rifle length gas system combined with the new Muzzle Climb Mitigator Gen II, providing the smoothest and flattest shooting possible.

“Whether it’s for a soldier on the battlefield or for home defense, we only make our rifles one way: to the highest possible standard. Because lives depend on it.”

- Marty Daniel

COMPLETE DD RIFLES MK18 SBR

5.56

Use what "THEY" use. The Daniel Defense MK18 features the railed forend Daniel Defense currently provides to USSOCOM, and a 10.3" Cold Hammer Forged Barrel. The MK18 rail system features the patented Bolt-Up System attachment system and has been rigorously tested prior to fielding by USSOCOM (currently over 20,000 units). The MK18 Factory SBR is unmatched in size, weight, and performance. Class III dealers only. All NFA rules apply.

The RIS II Rail mounts to the receiver using our military-tested and adopted 6-bolt Bolt-Up System, providing an incredibly strong user-serviceable interface, a free-floated barrel, and an uninterrupted top rail.

The weapon of choice for state & federal law enforcement agencies and special operations forces. Photo Courtesy US Department of Defense

The Daniel Defense Rail Interface System II (DD RIS II) was designed at the request of the United States Special Operations Command (SOCOM) for the SOPMOD II weapons system. After years of rigorous testing by Special Forces Operators, Daniel Defense was selected as the Sole Source Provider of the RIS II to SOCOM. The Daniel Defense fixed sights are available separately; see the "accessories" section.

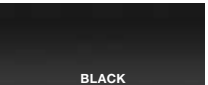

The DDMK18 is available with either FDE or Black RIS II rail, or coated in our exclusive MilSpec+™ Cerakote.

This firearm is a regulated item by the National Firearms Act (NFA). Please check with your local and state municipalities for any further regulatory requirements. It is the buyer's responsibility to make sure they comply with all NFA rules and applicable laws.

COMPLETE DD RIFLES M4A1

5.56

The public deserves to own the same firearms we offer the military. The M4A1 from Daniel Defense represents a combat-proven rifle, and features a 14.5" hammer forged barrel inside the RIS II Rail System trusted for use by US Special Operations Command (SOCOM) since 2005.

The DD M4A1 is built around a cold hammer forged 14.5" chrome lined M4 profile barrel. We pin an extended DD improved flash suppressor to the end to bring the overall barrel length to just over 16", avoiding the NFA regulation and transfer tax.

The M4A1 configuration is part of the SOCOM "Block II" carbine kit and is currently used by a wide variety of U.S. forces. Photo Courtesy US Department of Defense

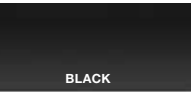

The M4A1 Rail Interface System II (RIS II) attaches to the receive by means of DD's battle-proven Bolt-Up System. The Daniel Defense fixed sights are available separately; see the "accessories" section.

The M4A1 is also available finished in Daniel Defense's exclusive Mil Spec+ Cerakote.

COMPLETE DD RIFLES MK12

5.56

Introduced in 2014, The DD MK12, chambered in 5.56 NATO, gives the shooter greater effective range, as would be expected from a firearm conceived from the need for a semi-automatic, Special Operations Forces precision rifle. A product of innovative design and advanced manufacturing techniques, the MK12 from Daniel Defense features an 18" Stainless Steel Barrel that is Cold Hammer Forged for a longer life and even greater accuracy.

The MK12's Cold Hammer Forged 18" stainless steel barrel (salt bath nitride) and stainless MK12 low profile gas block (black oxide) are designed and built to provide the ultimate in durability, performance, and corrosion resistance.

The DD MK12 provides incredible trigger control and feel thanks to its two-stage Super Semi-Automatic (SSA®) trigger from Geissele Automatics.

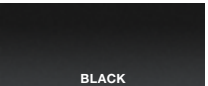

The DDM4 Rail™ 12.0 provides a continuous upper rail platform allowing the shooter to mount any optic of choice while allowing a longer sight radius for back-up sights.

Also available in Daniel Defense Tornado™ Cerakote with bead-blasted stainless barrel.

The 18" Cold Hammer Forged Stainless Steel Barrel and MK12 Gas Block are designed to US Special Operations Command (SOCOM) specifications.

» MK18 PISTOL 5.56

The DD MK18 Pistol is a variation of the MK18 SBR which has been extremely popular within the Law Enforcement and Special Operations communities. A newly-designed pistol receiver extension classifies it as a Pistol and not a Short Barreled Rifle (NFA regulated items require ATF approval and a tax stamp). It features the MK18 RIS II and a 10.3" Cold Hammer Forged barrel with carbine length gas system, the same length commonly used for CQB operations. The MK18 Pistol by Daniel Defense is unmatched in size, weight, and performance and is available with a Black or FDE Type III Hard Coat Anodized Rail System.

The Daniel Defense fixed sights are available separately; see the "accessories" section.

» DDM4300 PISTOL 300BLK

The Daniel Defense fixed sights are available separately; see the "accessories" section.

The Daniel Defense 300 Pistol, chambered in 7.62 x 35mm, is a variation of the 300 SBR and is ideal for close quarters and home defense. A newly-designed pistol receiver extension classifies it as a Pistol and not a Short Barreled Rifle (NFA regulated items require ATF approval and a tax stamp). This new option from Daniel Defense comes complete with a 10.3" Cold Hammer Forged Strength-to-Weight barrel, pistol length gas system, pinned low profile gas block, and DDM4 Rail™ 9.0.

COMPLETE DD RIFLES **»»** DDM4ISR

The Daniel Defense DDM4ISR (Integrally Suppressed Rifle) 300 joins our family of precision-crafted M4 Rifles. The ISR takes advantage of the best characteristics of the 300BLK by integrating key components into one package, eliminating the need for two separate tax stamps.

While the rifle utilizes a 10.3" barrel, it is not classified as an SBR (Short-Barreled Rifle) because the suppressor is permanently attached. The DDM4ISR 300's sound suppressor is threaded and welded to the proprietary ISR Integrated gas block, bringing the barrel length to 16.145". *While the rifle is at the 16" legal limit, the ISR's integrated suppressor will require an NFA tax stamp. Class III dealers only. All NFA rules apply.*

The integral suppressor sits halfway inside the MFR™ rail. The design allows extra volume inside the suppressor to maximize suppression while the extended design brings the overall barrel length past the federally-mandated 16", preventing the owner from having to register the ISR as a regulated short barrel rifle (SBR).

The ISR suppressor's one-piece core easily removes with the help of the included tool to facilitate end-user cleaning and maintenance.

300BLK (7.62x35mm)

The 300 AAC BLACKOUT is a .30 caliber cartridges developed for use in AR15-style firearms. Unlike its wildcat predecessors, the 300 BLK is a SAAMI-standard cartridge. It provides 7.62x39mm or better ballistics from the AR platform with only a barrel change. It uses standard 5.56 bolts and magazines. Ammunition is available in both subsonic and supersonic loads.

When shooting subsonic ammunition, the integrally-suppressed barrel of the ISR produces overall sound pressure levels below even those of suppressed 9mm submachineguns, delivering an impressive 220gr payload downrange. With no adjustments to the rifle, the user can switch to high performance supersonic ammunition for extended range shooting. The Daniel Defense fixed sights are available separately; see the "accessories" section.

This firearm is a regulated item by the National Firearms Act (NFA). Please check with your local and state municipalities for any further regulatory requirements. It is the buyer's responsibility to make sure they comply with all NFA rules and applicable laws.

RAIL SYSTEMS » OVERVIEW

Daniel Defense continues to be the industry leader in the design and manufacture of lighter, stronger rail systems. In support of the Designated Marksman Rifle Program, Daniel Defense established itself by supplying the Army Marksmanship Unit with the M4 Rail™. Our dedication to cutting edge technology, manufacturing and quality control, has led the way to winning the coveted US Special Operations Command (SOCOM) Rail System Contract and becoming the sole source provider to the UK Ministry of Defense (MOD), supplying rail systems for their SA80/L85. Our designs, manufacturing, and commitment to quality control continue to be cutting edge.

All Daniel Defense Rail Systems are built to the 1913 Military Specification, and the Mil-Spec Type III Hard Coat Anodized Finish creates a stronger, more durable surface. The majority of our rails feature a free-floating design, allowing the barrel's harmonics to be unaffected by accessories mounted to the rail system. Our patented attachment technology and state of the art manufacturing all lead to top of the line rail platforms.

QUALITY CONTROL

Just like with our industry-leading DDM4 rifles, our rail systems undergo unrivaled quality control procedures. In order to offer

our end users a lifetime guarantee, extensive thought and rigorous testing is standard with every step. Highly-skilled personnel are equipped with the latest technology in measuring and test equipment, such as the CMM (Coordinate Measuring Machine), Laser Measuring Equipment, and Vision Systems to ensure every component meets or exceeds specifications. Driven to increase customer satisfaction, Daniel Defense is adopting the ISO-9001 Quality Management Standard—the standard recognized internationally for the quality management of business.

RAIL SYSTEMS

» AR15 LITE RAIL III™

The AR15 Lite Rail III™ is the third generation of Lite Rail from Daniel Defense. The improved design enhances the rail's structural integrity, improves functionality, ergonomics, aesthetics and ease of installation to the weapon system without compromising its best-known attributes, one of which being the lightest rail system on the market. Enhanced features include a machined one-piece design, replacing the previous two-piece welded design of the first generation Lite Rail, and uses our patented Bolt-Up System. The AR15 Lite Rail III™ requires only 4 bolts instead of 6 and has tabs that aid in alignment to the upper receiver during installation. Front and Rear Sling Swivel Attachment Points are integrated into both the left and right side rails and are designed to limit the swivel's rotation, preventing twists and tangles in slings.

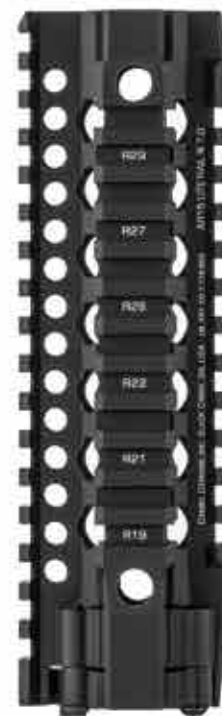

- Lightweight Free-Floating Barrel Design
- Uninterrupted Upper Rail Platform
- Aircraft Grade Aluminum
- Hardened Steel Barrel Nut
- Mil-Spec Type III Hard Coat Anodized Finish
- Mil-Spec Fasteners
- Mil-Spec 1913 Picatinny Rails

The AR-15 Lite Rail III™ is has an uninterrupted upper rail platform that is achieved by the patented "Bolt-Up System". This allows the operator to mount an optic on the top rail wherever needed.

The AR-15 Lite Rail III™ is a free-float rail system. This means the barrel's harmonics are not affected by outside forces. All the weight of the accessories are supported by the rail system.

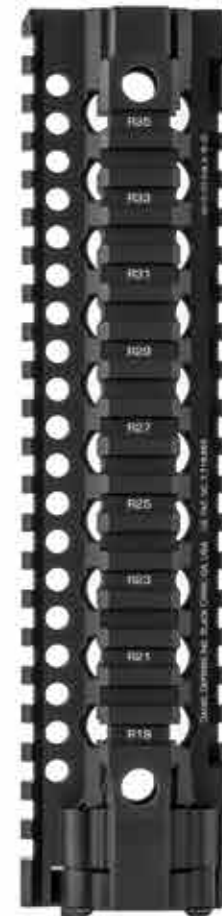

AR15 LITE RAIL III™ 7.0

Perfect for carbine length gas systems, giving you enough room and versatility for the essentials.

- AR15 LITE RAIL III™ 7.0 // MFG# 01-002-00141
- AR15 LITE RAIL III™ 9.0 // MFG# 01-002-09333
- AR15 LITE RAIL III™ 12.0 // MFG# 01-002-09431
- AR15 LITE RAIL III™ 12.0 FSP // MFG# 01-002-22175
- AR15 LITE RAIL III™ 15.0 // MFG# 01-002-00256

- Weight: 8.3 oz.
- Length: 7.23"
- Width: 1.90"

AR15 LITE RAIL III™ 9.0

For mid-length gas systems, this rail allows the user to mount a rail flush to the front sight post, while leaving plenty of room for accessory mounting.

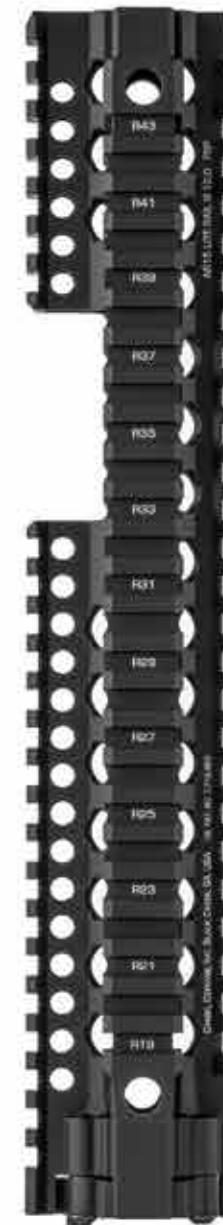

- Weight: 10.3 oz.
- Length: 9.22"
- Width: 1.90"

AR15 LITE RAIL III™ 12.0

At just over 12", the AR15 Lite Rail III™ is perfect for Mid-length gas systems with low profile gas blocks.

- Weight: 13.2 oz.
- Length: 12.43"
- Width: 1.90"

AR15 LITE RAIL III™ 12.0 FSP

Perfect for use in conjunction with carbine gas system and front site base. Provides extra rail real estate beyond the front site.

- Weight: 12.6 oz.
- Length: 12.43"
- Width: 1.90"

AR15 LITE RAIL III™ 15.0

For those that can't get enough rail real estate, the 15" version accommodates low profile gas blocks on rifle, mid-length or carbine gas systems.

- Weight: 15.6 oz.
- Length: 15.20"
- Width: 1.90"

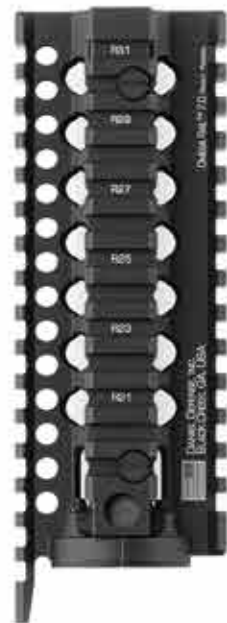

RAIL SYSTEMS **» OMEGA RAIL®**

The Daniel Defense Omega Rail® delivers a much needed product specifically engineered to satisfy the intense demands of the military and law enforcement communities. The Omega Rail® is the only free-float rail system that accommodates individual operator installations requiring ZERO modification to the host weapon! The Omega Rail® features integrated limited rotation QD sling swivel mounts and has an uninterrupted upper rail platform. All Omega Rail® fasteners are built to Mil-Specs for finish and quality.

The Omega Rail is designed to work with all commercially available M4 or AR15 gas systems. Its exceptional strength-to-weight ratio makes it the perfect selection for your M4 or AR15-style weapon. All Daniel Defense rail systems are built to the 1913 Mil-Spec and are 100% quality assurance checked for conformity to the specification.

- Lightweight Free-Floating Barrel Design
- User Installed With No Special Tools
- Zero Modification To Host Weapon
- Uninterrupted Upper Rail Platform
- Oval Shape To Feel Like Traditional Handguard
- Integral QD Sling Swivel Mounts with Limited Rotation Feature
- Aircraft Grade Aluminum
- Mil-Spec Type III Hard Coat Anodized Finish
- Mil-Spec Fasteners
- Mil-Spec 1913 Picatinny Rails

OMEGA™ 7.0 CARBINE // MFG# 01-005-10001
OMEGA™ 9.0 MID // MFG# 01-005-10002
OMEGA™ 12.0 RIFLE // MFG# 01-005-10003

OMEGA RAIL® 7.0
 Designed to work with standard Carbine Gas System weapons.

- Weight: 7.6 oz.
- Length: 6.875"
- Width: 1.9"

OMEGA RAIL® 9.0
 Designed to work with standard Mid-length gas systems or over a low profile gas block on a carbine length gas system.

- Weight: 9.8 oz.
- Length: 8.875"
- Width: 1.9"

OMEGA RAIL® 12.0
 Designed to work with rifle length gas systems or over a low profile gas block on a Carbine or Mid-length gas system rifle.

- Weight: 13.4 oz.
- Length: 12.4"
- Width: 1.9"

RAIL SYSTEMS

SLiM RAIL™

The SLiM Rail™ (Slim, Lightweight, Modular) from Daniel Defense utilizes the KeyMod accessory attachment system for incredible weight savings as well as superior cooling, ergonomics, and modularity while maintaining the strength and durability expected from Daniel Defense. KeyMod is a recoil-resistant, two-part, direct-attachment method for accessories that offers outstanding "return-to-zero" when accessories are removed and reinstalled. The SLiM Rail™ features the battle-proven "Bolt-Up System" which provides modern flat-top upper receivers with a free-floating, continuous, uninterrupted upper rail platform and allows for simplified alignment to the host weapon upper receiver. Ambidextrous sling swivel attachment points are integrated into both the left and right side rails at 1 and 11 o'clock. The SLiM Rail™ can be used with a low-profile gas block on pistol, carbine, or mid-length gas systems.

- Lightweight Free-Floating Barrel Design
- Steel Barrel Nut
- Uninterrupted Mil-Spec 1913 Picatinny Upper Rail
- KeyMod attachment at 3, 6, & 9 o'clock positions
- Ambidextrous Sling Swivel Attachment Points at 1 and 11 o'clock
- Patented Bolt-Up mounting System
- Aircraft Grade 6061-T6 Aluminum
- Mil-Spec type III Hard Coat Anodized Finish
- Mil-Spec Fasteners

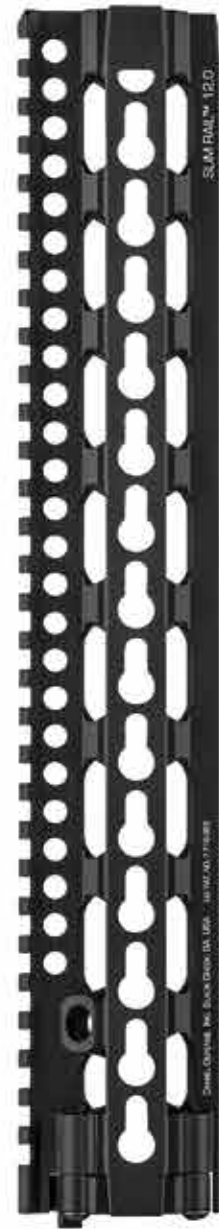

SLiM RAIL™ 9.0
Designed to work with standard mid-length gas system weapons or over a low profile gas block on carbine length gas system.

- Weight- 8.6 oz
- Length- 9.22"
- Width- 1.74"

SLiM™ 9.0 // MFG# 01-147-81662

SLiM™ 12.0 // MFG# 01-147-02038

SLiM™ 15.0 // MFG# 01-147-22026

SLiM RAIL™ 12.0
Designed to work with standard rifle length gas systems or over a low profile gas block on a mid- or carbine-length gas system.

- Weight- 9.9 oz
- Length- 12.43"
- Width- 1.74"

SLiM RAIL™ 15.0
Designed to work with standard rifle length gas systems or over a low profile gas block on a rifle, mid-, or carbine length gas system.

- Weight- 11.2 oz
- Length- 15.20"
- Width- 1.74"

NEED TO KNOW DD CHF BARRELS

Cold Hammer Forging (CHF) of barrels has been known for decades to produce the most accurate, longest lasting rifle barrels obtainable. The Cold Hammer Forging of barrels is accomplished through intense hydraulic pressure applied at opposing angles by carbide steel hammers. During the hammering process, a mandrel is inserted into the bore while the carbide steel hammers shape the barrel around the mandrel creating the chamber, the lands, and the grooves. In addition to the aforementioned benefits, the Cold Hammer Forging process changes the micro-structure of the steel making it stronger, with a defect-free bore and the most consistent chamber possible.

What started for Daniel Defense as a barrel project has quickly proven to be an industry changer. Unable to locate a supplier of Cold Hammer Forged barrels for our own rifles, we purchased a Hammer Forge capable of supporting our needs. In early 2009, after months of research and development and labor-intensive testing, Daniel Defense introduced one of the only commercially available 5.56 Cold Hammer Forge Barrels in the United States.

After fine-tuning the manufacturing process and proving these barrels to be some of the most accurate and durable currently available, Daniel Defense introduced an entire line of Cold Hammer Forged Barrels.

All Daniel Defense barrels are made from start to finish in our state-of-the-art facility located in Black Creek, Georgia. With the capacity to manufacture 8000 barrels each and every month, quality control standards have never been more crucial. Sophisticated equipment such as the Hommel Optic, Micro-VU and Bore Scope are used routinely for complex measurements, ensuring each barrel is to spec.

Daniel Defense barrels are finished with either a heavy phosphate exterior coating with chrome lining, salt bath nitride treated, or in the case of certain stainless steel barrels, a bead-blasted, chemically passivated finish.

BARREL PROFILES

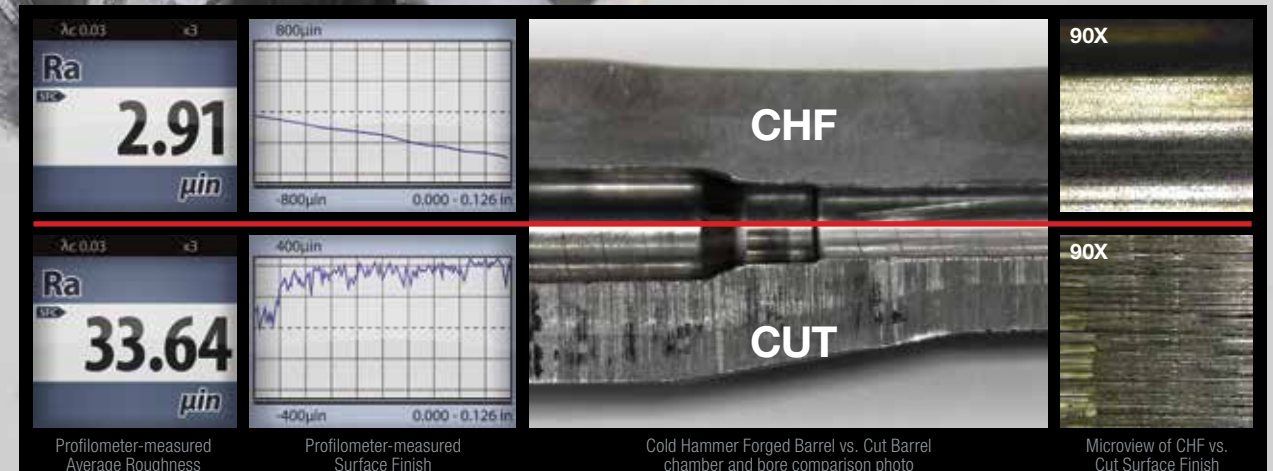

1. M4
2. Government
3. Lightweight
4. Strength 2 Weight (S2W®)

GAS SYSTEM LENGTH

1. Pistol
2. Carbine
3. Mid-length

This is the core element within our Hammer Forge Machine. These four hydraulic hammers are responsible for shaping our barrel blanks around a carbide mandrel which creates the lands and grooves of the bore as well as the chamber. Up to 8,000 barrels pass through this machine each month. Cold Hammer Forging (CHF) produces barrels with a surface finish 11.5X smoother than traditional "cut" barrels as shown in the below comparison.

CMV (Chrome Moly Vanadium), CHF (Cold Hammer Forged),

ACCESSORIES

» MUZZLE DEVICES

Daniel Defense offers its own line of premium muzzle devices that have been designed, tested, and manufactured to meet the expectations of the most demanding consumers. The Daniel Defense Flash Suppressor and Superior Suppression Device, in a series of tests, showed improved flash suppression over the traditional A2 Birdcage. For the shooter driven by accuracy, the new Daniel Defense Muzzle Climb Mitigator Gen II redirects propellant gasses through calibrated ports, countering both recoil and muzzle climb. Less recoil and muzzle climb results in quicker, more precise follow-up shots and reduced fatigue. In keeping with the highest standard of quality, Daniel Defense muzzle devices are constructed from the highest grade 17-4 PH stainless steel and salt bath nitride finished to reduce corrosion and wear.

Daniel Defense Muzzle Devices are available in 1/2-28 (5.56mm) or 5/8-24 (6.8 SPCII, 300 AAC, 7.62mm)TPI and come in standard or extended lengths. The standard length flash suppressor, 1/2 x 28 TPI, is compatible with certain aftermarket sound suppressors.

DD ENHANCED VERT. FOREGRIP

Daniel Defense Enhanced Vertical Grip includes soft touch rubber overmolding for enhanced grip, wet or dry. Dual O-Ring, water tight storage compartment is capable of storing small parts. Extremely lightweight and utilizes a simple, yet durable mounting method.

Available in Black, Mil Spec+™, Daniel Defense Tornado™.

DD ENHANCED PISTOL GRIP

Daniel Defense's Enhanced Pistol Grip features a more ergonomic wrist angle and integrated, oversized trigger guard for strength and comfort. Soft touch rubber overmolding gives the shooter a reliable hold in all weather conditions.

Available in Black, Mil Spec+™, Daniel Defense Tornado™.

DD ENHANCED BUTTSTOCK

The Daniel Defense Enhanced Buttstock is constructed of a proprietary blend of glass infused polymers and finished off with soft touch rubber overmolding in strategic points. It's precision formed for mil-spec receiver extensions, minimizing forward or lateral play. This eliminates the need for a tensioning device or friction lock. All of which results in a durable buttstock that provides a comfortable, repeatable cheek weld and unprecedented control of the firearm. The buttstock can be run with the included convex or concave buttpads or without to accommodate the operator's gear. Limited rotation QD swivel attachment points are integrated on both sides for ambidextrous sling attachment.

Available in Black, Mil Spec+™, Daniel Defense Tornado™.

Quickly and easily upgrade the control, comfort, and modularity of your AR-15 with our new enhanced rifle furniture.

The Daniel Defense Omega Rail 7.0 (shown) is the perfect drop-in replacement for plastic handguards on a carbine gas system. See page 38.

ACCESSORIES » AR PARTS

Daniel Defense is proud to offer the finest AR parts in the industry. Whether you're repairing an older gun, building a brand new one, or even upgrading a competitor's gun, visit danieldefense.com/components-parts.html for an up-to-date listing of availability.

LOWER PARTS KIT

The Daniel Defense Enhanced Lower Parts Kit includes all of the same internal components used in the acclaimed Daniel Defense M4 carbine. Includes components necessary to finish your stripped lower. Includes A2 pistol grip and MOE® Trigger Guard.

MFG# 05-013-21007

BOLT CARRIER GROUP

The 5.56 Bolt Carrier Group includes a complete bolt, firing pin, carrier and gas key. The group comes fully assembled with the gas key properly staked. All Daniel Defense bolt carrier groups pass a thorough Magnetic Particle Inspection (MPI) test before shipping. The carrier is chrome lined and the entire assembly features a heavy Mill-Spec phosphate coating for superior corrosion resistance.

MFG# 04-013-02146

BOLT ASSEMBLY

Daniel Defense's complete 5.56 bolt assembly. MPI tested and finished with a heavy phosphate coating.

MFG# 04-013-09302

CHARGING HANDLE ASSBLY.

Precision CNC machined from 7075 Aluminum the Daniel Defense charging handle comes complete with latch and is finished with a Mill-Spec type III hard coat anodization.

ACCESSORIES » MOUNTS

AIMPOINT® MICRO MOUNT

Daniel Defense's Micro Mount is designed to work in conjunction with Aimpoint's popular Micro R-1, H-1, T-1 and T-2 optics. Offering absolute or a lower 1/3rd co-witness with your back-up iron sights, this mount is ideal for shooters who are looking for the lightest mount to accent their Aimpoint® Micro. Its lightweight, essentials-only design offers a snag-free, low-profile, reversible mounting option for shooters that do not require a quick attach/detach mounting solution. The Aimpoint® Micro Mount features our Rock & Lock® attachment method and secures to any MIL-STD 1913 Picatinny rail. Machined from 6061 aircraft grade aluminum and Mil-Spec hardcoat anodized.

1 O'CLOCK OFFSET RAIL

The Daniel Defense 1 O'clock Offset Rail is optimized for mounting miniature red dot optics in the 1 o'clock (right-hand) or 11 o'clock (left-hand) positions for quick, non-magnified transitions when employing magnified primary optics on AR-type rifles with MIL-STD 1913 rails. The geometry allows for zero cheekweld shift during the transition, which facilitates very fast transitions between magnified and non-magnified optics. It can also be used for a variety of lights and accessories. By flipping the part upside-down, one can mount a light in a good position for use with a vertical foregrip. The 1 O'clock Offset Rail features our Rock & Lock® attachment method and secures to any MIL-STD 1913 Picatinny rail. Machined from 6061 aircraft grade aluminum and Mil-Spec hardcoat anodized.

OFFSET FLASHLIGHT MOUNT

The Daniel Defense Offset Flashlight Mount is designed for use in conjunction with a vertical foregrip. Innovative engineering ensures that the user's thumb has quick and easy access to the rear button of a mounted flashlight without compromising any control of the weapon. This set up eliminates accidental light discharges and is an essential part of a tactical professional's weapon set-up. The new one-piece design increases structural integrity, while our patented Rock & Lock® technology makes for easier installation and eliminates the need for multiple attachment points.

RAIL MOUNT QD SWIVEL ATTACHMENT

The Daniel Defense Rail Mount QD Swivel Attachment Point is designed to mount the swivel anywhere along the rail system. Designed and machined to limit the rotation of the swivel to prevent the operator's sling from becoming tangled. The new one-piece design increases structural integrity, while our patented Rock & Lock® technology makes for easier installation and eliminates the need for a second attachment piece.

REAR RECEIVER QD SWIVEL ATTACHMENT

The Daniel Defense QD Swivel Attachment Point provides an ambidextrous attachment of the popular Heavy Duty Push Button QD Sling Swivel. This steel-constructed, swivel attachment mounts to the rear of the lower receiver with a collapsible stock receiver extension. The swivel's rotation is limited by the buffer tube, preventing tangles.

EZ CARBINE SLING MOUNT

The Daniel Defense EZ Carbine Sling Mount is the perfect sling mount for Law Enforcement Agencies and Military Units who must comply with restrictions to modifications of issued weapons. The new one-piece design slides easily over the buffer tube for attachment to the receiver extension. The swivel's rotation is limited to ensure the sling does not become tangled. Lightweight, the EZ Carbine Sling Mount weighs less than an ounce and is more aesthetically pleasing than before.

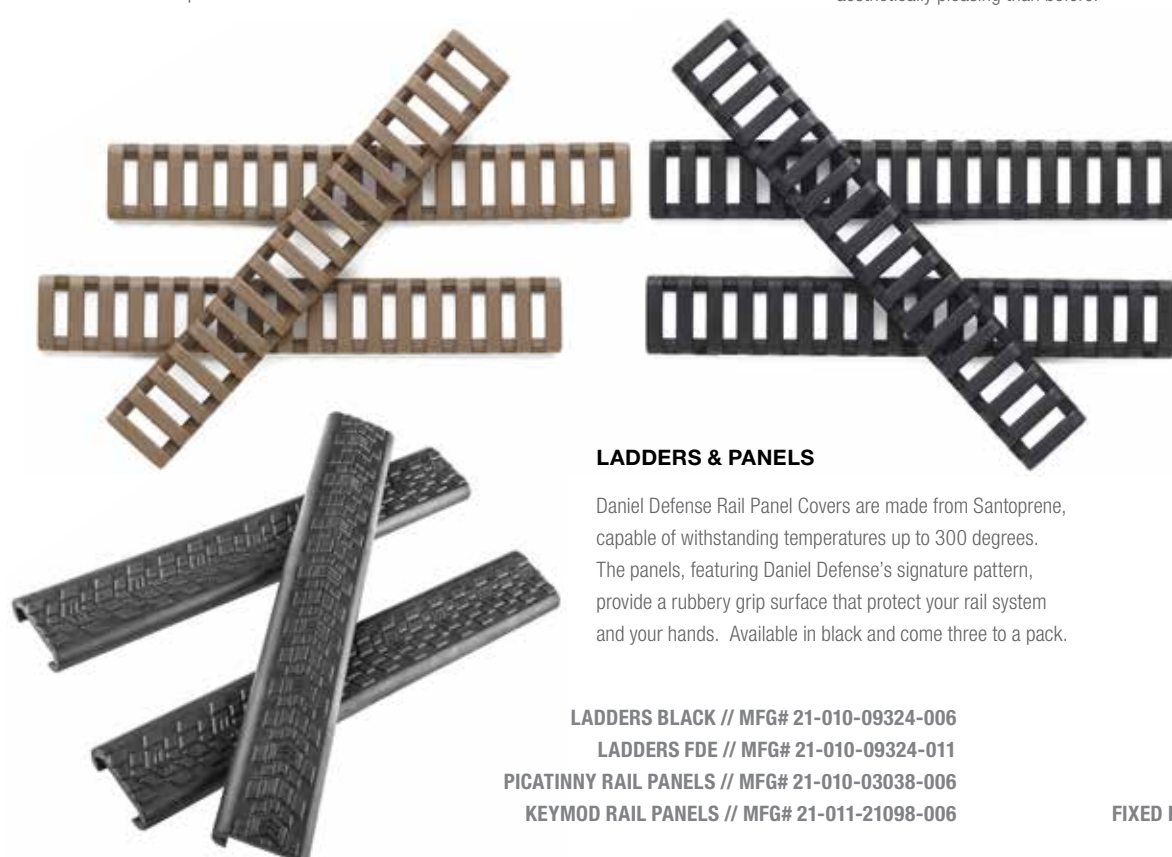

FIXED FRONT SIGHT

The perfect Rail-Mount Fixed Front Sight. The lightweight, streamlined design makes it unobtrusive and snag-free. The one-piece design makes it easy to install on any MIL-STD-1913 rail and it secures with a slotted fastener threaded into a self-locking stainless steel thread insert. Special attention was paid to facilitate the use of compact weapon-lights forward of the sight, such as the X300 and TLR-1. The concave radius on either side of the sight is a great place to rest your thumb for easy, ambidextrous activation of the light. Machined from 6061-T6 aluminum and Mil-Spec Hard Coat Anodized, our Rail-Mount Fixed Front Sight is both lightweight and durable and is the perfect complement to our A1.5® Fixed Rear Sight. The rear surface features anti-glare serrations.

A1.5® FIXED REAR SIGHT

The A1.5® Fixed Rear Sight's lightweight, streamlined design makes it the optimum fixed iron sight for shooter's using today's most popular optics. It's engineered not to impede use of the charging handle on M4-type rifles and installs easily on any flattop upper receiver using our patented Rock & Lock® attachment method.

LADDERS & PANELS

Daniel Defense Rail Panel Covers are made from Santoprene, capable of withstanding temperatures up to 300 degrees. The panels, featuring Daniel Defense's signature pattern, provide a rubbery grip surface that protect your rail system and your hands. Available in black and come three to a pack.
